

Hazard Communication Standard Pictogram

As of June 1, 2015, the Hazard Communication Standard (HCS) will require pictograms on labels to alert users of the chemical hazards to which they may be exposed. Each pictogram consists of a symbol on a white background framed within a red border and represents a distinct hazard(s). The pictogram on the label is determined by the chemical hazard classification.

HCS Pictograms and Hazards

Exclamation Mark Health Hazard Flame Carcinogen Flammables Irritant (skin and eye) Pyrophorics Mutagenicity Skin Sensitizer Reproductive Toxicity Self-Heating Acute Toxicity (harmful) Respiratory Sensitizer Emits Flammable Gas Narcotic Effects Target Organ Toxicity Self-Reactives Respiratory Tract Aspiration Toxicity Organic Peroxides Irritant Hazardous to Ozone Layer (Non-Mandatory) Gas Cylinder Corrosion **Exploding Bomb** Gases Under Pressure Skin Corrosion/ Explosives Burns Self-Reactives • Eye Damage Organic Peroxides Corrosive to Metals Flame Over Circle **Environment** Skull and Crossbones (Non-Mandatory)
